SUMMARY OF INTERVIEW

Pursuant to MPEP § 713.04, Applicants submit the following summary of an applicant-initiated interview with Examiner Lim conducted on August 11, 2006.

Brief Description of the Nature of any Exhibit Shown or any Demonstration Conducted:

No exhibits were shown and no demonstrations were conducted.

Identification of the Claims Discussed:

The limitations of independent Claims 6 and 11 were discussed.

Identification of Specific Prior Art Discussed:

Davis, *et al.*, U.S. Patent No. 6,125,064 (“Davis”).

Identification of the Principle Proposed Amendments of a Substantive Nature Discussed:

The Examiner and Applicants’ representative generally discussed the differences between the independent claims and the Davis reference. The Examiner and Applicants’ representative discussed a proposed claim amendment that indicates the packets are transmitted at intervals based on a function of a current level of ambient network traffic and a proposed claim amendment that recites communication of a schedule of subsequent time intervals.

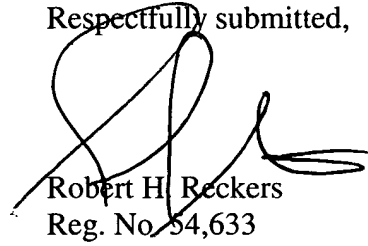

The General Thrust of the Principal Arguments of Applicants and the Examiner:

The Examiner and Applicants’ representative generally discussed the proposed claim amendments. The Examiner indicated that claim amendments directed to the level of ambient network traffic and/or the scheduling of subsequent time intervals may allow the claims to overcome the present rejection.

General Indication Of Any Other Pertinent Matters Discussed:

No other pertinent matters were discussed.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Robert H. Reckers', is written over the printed name and registration number.
